## FIRST QUARTER PROJECT (50 points) CELL PROJECT: BRAINSTORMING SHEET

DUE DATE:

Name:\_\_\_\_\_

Period:\_\_\_\_\_

Begin brainstorming your ideas for the cell project. You will be given more information regarding the project midweek. At this time, think about which option you are interested in choosing to do. This project will be counted as one exam grade towards your 1<sup>st</sup> quarter grade.

You will be required to choose one of the four choices for your cell project. For each choice, 8 organelles and/or structures must be included. Your choices are as follows:

- 1. A story about taking a journey through the cell.
- 2. A song about the cell.
- 3. A creative poem about the cell.
- 4. A poster that includes making an analogy for each organelle and/or structure.

In the space below, list the eight organelles you plan to include into your cell project. All projects must include the nucleus as one of their organelles!

After choosing one of the options for your project, describe in detail what ideas you have for creating the story, song, poem, or poster board.
