

## Graphing Objectives:

Define these key terms:

graph   data table   title   line graph   bar graph

- Explain how a graph helps biologists analyze data.
- Compare and contrast between line graphs and bar graphs.
- Identify the 2 variables that should be included when writing a title for a graph.
- Identify the 2 variables used when organizing a data table.
- Interpret the reading passage of a scientific experiment and the results from a data table.
- Analyze data from a table.
- Draw and plot data on graph paper.
